

# Connect Kisi to your Landlord's Access Control System

As a tenant in a multi-office building, you may encounter a main entrance door that uses a legacy access control system. However, with Kisi, you can still ensure continuous access from the building entrance door all the way to your own office door.

## Tenant Benefits

- Ability to [grant/revoke access to both the building and your office suite\(s\)](#) in Kisi
- [Low cost of implementation](#) - minimum hardware requirements
- [Enable Kisi's mobile in-app unlocks](#) and/or physical card unlocks at the main entrance of your building

## Landlord Benefits

- [Landlord still retains control](#) of the building's main entrance
- The building's system continues to function normally alongside Kisi
- Landlord no longer has to manage physical credentials (cards/fobs)
- [Increased security](#) with reduction of lost fobs or outdated access permissions
- [Tenant experience improvement](#) - easily turn the building into a smart building with mobile access
